

Micro Computer Consulting Inc. is the sole provider of IT services for Orange National Retail Group in Ontario. The MCC team handles all aspects of our network, phone, desktop, laptop and other mobile devices, including two full office moves in the past three years. Their expertise, responsiveness and reliability allow me to focus my attention on our core business of retail real estate consulting, instead of the underlying technology. MCC's technicians improve the productivity of our sales force by resolving issues quickly and getting it right the first time. Technology is critical to the success of our business and we can't afford to have disruptions. With MCC, we never have to worry.

Jeri J. Brodie
President
Orange National Retail Group (Ontario) Inc.
